CCNA BOOTCAMP

LIVE ONLINE TRAINING

Background

Cisco CCNA is by far one of the most relevant certifications in the industry, and also a challenging one to obtain. In February 24th, 2020, Cisco will revamp its CCNA test following a new curriculum. This is an offering, specifically designed for those who have been preparing for the current test or need to recertify.

The Value of Our Bootcamp

CertificationKits in partnership with Netquarks Technologies have created a 5-Week intensive bootcamp to boost your effort in achieving your certification. Our trainers are senior consultants and educators who are highly experienced with the exact challenges the test will present and how to address them.

Using a hands-on approach, you will cover a complete CCNA exam topic each week and the final week will be devoted to intensive exam practice, **your key to success!**

What do I get?

- You will be trained by senior instructors with a wealth of expertise both as teachers and as consultants
- You will have access to class recordings
- You will have access to a private discussion forum and a chat room with your instructor and peers
- You will be trained in exam-taking skills that are specific to what you can expect on a Cisco exam

What's Required?

In order to get the most out of your CertificationKits / Netquarks Bootcamp Experience:

- You already have experience with the CCNA curriculum and simply need to fine tune your skills
- You have created a free account in netacad.com and have downloaded the latest version of Cisco Packet Tracer and/or you are working on real equipment from a CertificationKits Lab Kit
- Your intention is to pass the current CCNA exam before the revision on February 24, 2020. While the vast majority of the information in this class will overlap with the new exam, this bootcamp is specifically designed to help you pass the current test before the revision and covers that material.
- You have confirmed your payment with CertificationKits
- **You're ambitious, eager to learn and ready to succeed on your test!**

Course Overview

The 5-week bootcamp is an intensive, hands-on experience which covers all exam topics in 96 hours. In order to achieve this, we will meet twice a week (4 hrs per class) and during Saturdays (8hrs). The structure of the course is as follows:

Week of 12/30: Network Fundamentals
Week of 01/06: LAN Switching Technologies
Week of 01/13: Routing Technologies
Week of 01/20: WAN Technologies
Week of 01/27: Infrastructure Security
Week of 02/03: Infrastructure Management
Week of 02/10: Final Exam Preparation (BONUS)

Schedule:

Mon / Wed: 6 p.m - 10 p.m CST & Sat: 8 a.m - 4 p.m CST

** Given the time pressure, we're available to adjust schedules if a significant amount of students require a different option. Feel free to communicate any special need to: sales@certificationkits.com, SUBJECT: CCNA Bootcamp Schedule.

Important Course Details

- Enrollment is open until December 25th
